Author Index Volume 12 Numbers 1–6

Almond, D. J. *A Model Field Theory in which Two Nambu-Goldstone Symmetries are Realised by One Massless Psuedoscalar Boson* 103
Anninos, P. A. *Derivation of a Mathematical Equation for the EEG and the General Solution Within the Brain and in Space* 1
Benson, Alvin K. *A Procedure for Obtaining Quantum Mechanical Transformation of Diagnatization from the Classical* 251
Benson, Alvin K. *A Further Link(s) with Inequivalent Representations in Quantum Field Theory* 321
Boya, Luis J. *Contact Transformations and Conformal Group. I. Relativistic Theory* . 47
Cerveró, José, M. *Contact Transformations and Conformal Group. I. Relativistic Theory* 47
Chacko, Thomas. *The Theory of Rest-Mass Quantisation* 95
Cohen, Isaac. *Generalization of Nambu's Mechanics* 69
Cohen, Isaac. *On Nambu's Generalized Hamiltonian Mechanics* 61
Cornwell, J. F. *Lie Algebra Bases for the Pseudo-Orthogonal Groups* 333
Dixon, Geoffrey. *The Elementary Particle Base Masses* 153
Epstein, Kenneth J. *Crux of the Clock Paradox* 135
Folomeshkin, V. N. *Zero Value of the Schwarzschild Mass for an Asymptotically Euclidian System of Gravitational Waves* 169
Garcia-Sucre, M. *Time in a Simple Model of a Physical System* 25
Garcia-Sucre, Máximo. *On the Statistics Consistent with Nambu's New Quantum Rules. Quarks?* 149
Hatch, Dorian M. *A Further Link(s) with Inequivalent Representations in Quantum Field Theory* 321
Herlt, E. *Diffraction of a Plane Electromagnetic Wave at a Schwarzschild Black Hole* . 81
Ihrig, E. *Mach's Principle in Cosmology* 401
Iwai, Toshihiro. *On Kinematical Invariances of the Equations of Motion* . . . 383
Kademova, K. V. *Observables and Transformation Properties of Fermions and Para-fermions Constructed in Terms of Bosons. I. The Physical Variables* . . 145
Kálnay, Andrés J. *On Nambu's Generalized Hamiltonian Mechanics* . . . 61
Kálnay, Andrés J. *On Localisability and Heisenberg's Fundamental Field* . . . 79
Kálnay, Andrés J. *Observables and Transformation Properties of Fermions and Para-fermions Constructed in Terms of Bosons. I. The Physical Variables* . . 145
Kálnay, Andrés J. *On the Statistics Consistent with Nambu's New Quantum Rules. Quarks?* 149
Kerner, Richard. *Generalised Magnetic Monopole for the Yang-Mills Field* . . 177
Kofinti, N. K. *On the Effect of Spin on the Gravitational Field* 241
Kofinti, N. K. *Some Physical Implications of a New Relativistic Boundary Condition* . 261
Koga, Toyoki. *Representation of the Spin in the Dirac Equation for the Electron* . 205
Krause, J. *Some Remarks on Orthonormal Tetrad Transport* 35
Krips, H. *Macroscopic Variables* 11
Laue, Hans. *About the Relation* $[X,P]=i$ 293
Mignani, R. *Crossing Relations Derived from (Extended) Relativity* . . . 299
Muraskin, M. *Further Studies in Aesthetic Field Theory VI: The Lorentz Group* . 157
Muraskin, M. *Further Studies in Aesthetic Field Theory VII* 161
Nanda, S. *Minkowski Space with Order Topology is Simply Connected* . . . 393
Ndili, F. N. *Algebraic Constraints for Higgs Multiplets* 199
Okeke, P. N. *Algebraic Constraints for Higgs Multiplets* 199

Panda, H. K. *Minkowski Space with Order Topology is Simply Connected* . . 393
Raman, S. *Derivation of a Mathematical Equation for the EEG and the General Solution Within the Brain and in Space* 1
Ramanujam, G. Alagar. *The Unitary Representation Operators* 407
Recami, E. *Crossing Relations Derived from (Extended) Relativity* . . . 299
Ring, Beatrice. *Further Studies in Aesthetic Field Theory VI. The Lorentz Group* . 157
Ruggeri, G. J. *The Nambu Mechanics as a Class of Singular Generalized Dynamical Formalisms* 287
Schlegel, Richard. *Cosmological Models and Non-Denumerable Singularities* . . 217
Sinha, B. B. P. *Dirac- and Lorentz-Invariant Symmetries in Mass and Four-Momentum for Superluminal Aspects* 191
Slawianowski, Jan J. *The Mechanics of an Affinely-Rigid Body* 271
Stephani, H. *Diffraction of a Plane Electromagnetic Wave at a Schwarzschild Black Hole* 81
Toller, M. *A General Scheme for Microscopic Theories* 349
Ward, J. P. *An Analysis of Bonnor's Dipole Solution* 273
Ward, J. P. *On the Role of Wooley's Killing Tensor in Einstein-Maxwell Theory* . 345
Werth, J.-E. *Pre-Quantisation for an Arbitrary Abelian Structure Group* . . . 183
Whiston, George S. *Topics on Space-Time Topology (III)* 225

Author Index Volume 13 Numbers 1–6

Arens, Richard. *Models for Relativistic Hamiltonian Interactions* 227
Bekenstein, Jacob D. *Positiveness of Mass and the Strong Energy Condition* . . 317
Booth, Dexter J. *Gravitationally Radiated Linear Momentum Flux* . . . 363
Boyling, J. B. *The Converse of the Entropy Principle for Compound Systems* . . 143
Buonomano, V. *A New Interpretation of the Special Theory of Relativity* . . 213
Chela-Flores, J. *Remarks on Gauge Theories of Fundamental Forces* . . . 17
Chukwumah, G. C. *Structural Parameters of Semi-Simple Lie Algebras* . . . 125
Chukwumah, G. C. *Testing Gauge Theories in Electron-Electron Scattering* . . 387
Cohen, Harold. *A Comparison of Two Models of the ρ-Meson* 365
Cordero, P. *A Spectrum-Generating Algebra for Particles* 265
Corsiglia, L. *Space-Time Spaceless-Timeless Interactions* 183
Edmonds, James D. Jr. *Six Bits for Nine Colored Quarks* 259
Edmonds, James D. Jr. *Generalization of Einstein's Equation for Nonsymmetric* $T_{\mu\nu}$. 297
Edmonds, James D. Jr. *Mass Term Variations in the Dirac Hydrogen Atom* . . 431
Edwards, Jack. *Lamb Shifts for Hydrogen, Using the Sachs Elementary Interaction Theory* 291
Eilers, Manfred. *The Theorem of Gleason for Nonseparable Hilbert Spaces* . . 419
Frehland, Eckart. *Gravitational Radiation Generated by the Gravitational Scattering of Two Stars* 401
Gallo, C. F. *A New Red Shift Mechanism with Possible Applications to Astrophysical Problems Such as Quasars* 417
Griffiths, J. B. *On the Superposition of Electromagnetic Waves in General Relativity* . 9
Horst, Ernst. *The Theorem of Gleason for Nonseparable Hilbert Spaces* . . . 419
Kenny, John. *An Electromagnetic Inertial Mass Theory Applied to Elementary Particles* 341
Kirch, Dietmar. *Some Theoretical and Experimental Aspects of the Tachyon Problem* 153
Klotz, Frederick S. *Solution of the Zero Rest-Mass Equations for Free Fields in the Einstein Static Universe* 175
Koga, Toyoki. *A Rational Interpretation of the Dirac Equation for the Electron* . 271
Koga, Toyoki. *A Relation between the Dirac Field of the Electron and Electromagnetic Fields* 377
Kohler, Robert H. *Irreversible Behavior of Forced Systems* 37
Lord, Eric. *Generalised Quaternion Methods in Conformal Geometry* . . . 89
Mache, Christoph. *Gravitational Radiation Generated by the Gravitational Scattering of Two Stars* 401
Marinov, Stefan. *The Experimental Verification of the Absolute Space-Time Theory–I. The Fundamental Conception of the Absolute Space-Time Theory* . 189
Marx, Egon. *"Surface" Element on the Light Cone* 149
Mathews, P. M. *Evaluation of the Density Matrix for an Ensemble of Anharmonic Oscillators by a Path Integral Approach* 279
Muraskin, M. *Particle Behavior in Aesthetic Field Theory* 303
Ndili, F. N. *Structural Parameters of Semi-Simple Lie Algebras* 125
Ndili, F. N. *Testing Gauge Theories in Electron-Electron Scattering* . . . 387

Nickerson, J. Charles. *Four Dimensions and Reference "Frames": Some Operational Interpretations* 337
Nuthakki, Purna. *The Interpretation of the Theory of Relativity* 27
Okeke, P. N. *Structural Parameters of Semi-Simple Lie Algebras* 125
Okeke, P. N. *Testing Gauge Theories in Electron-Electron Scattering* 387
Rasetti, Mario. *Generalized Definition of Coherent States and Dynamical Groups* . 425
Razavy, M. *Time Evolution of Quasi-Stationary States* 237
Rebelo, I. *A New Differential Calculus on a Complex Banach Space with Application to Variational Problems of Quantum Theory* 323
Sachs, M. *The Lamb Shift in Helium from a Self-Consistent Field Theory of Electrodynamics* 73
Salamó, S. *A Spectrum-Generating Algebra for Particles of Spin* 265
Seshadri, M. S. *Evaluation of the Density Matrix for an Ensemble of Anharmonic Oscillators by a Path Integral Approach* 279
Sharma, C. S. *A New Differential Calculus on a Complex Banach Space with Application to Variational Problems of Theory* 323
Stettner, Roger. *The Electromagnetic Energy and Momentum of Finite Charged Bodies Moving at Constant Velocity* 103
Strazhev, V. I. *Galilean Invariance and Magnetic Charge* 113
Tabensky, R. *Brans-Dicke Plane Symmetric Vacuum* 1
Ulmer, W. *Spinor Fields in the Theory of Relativity and a Generalization of Heisenberg's Nonlinear Spinor Equation* 51
Weaver, D. L. *Spin-Two Symmetric Spinors and Elastic Scattering of Massive Spin-Two Particles* 393
Yu, Hung. *The Lamb Shift in Helium from a Self-Consistent Field Theory of Electrodynamics* 73
Zamorano, N. *Brans-Dicke Plane Symmetric Vacuum* 1
